On which tentacle of the OCTApus is ethical buddy sitting?

Flag Format : `flag{rank_points}`

▼ View Hint

Think of a place **where** eight rays meet the sun online

▼ View Hint

search for A91y

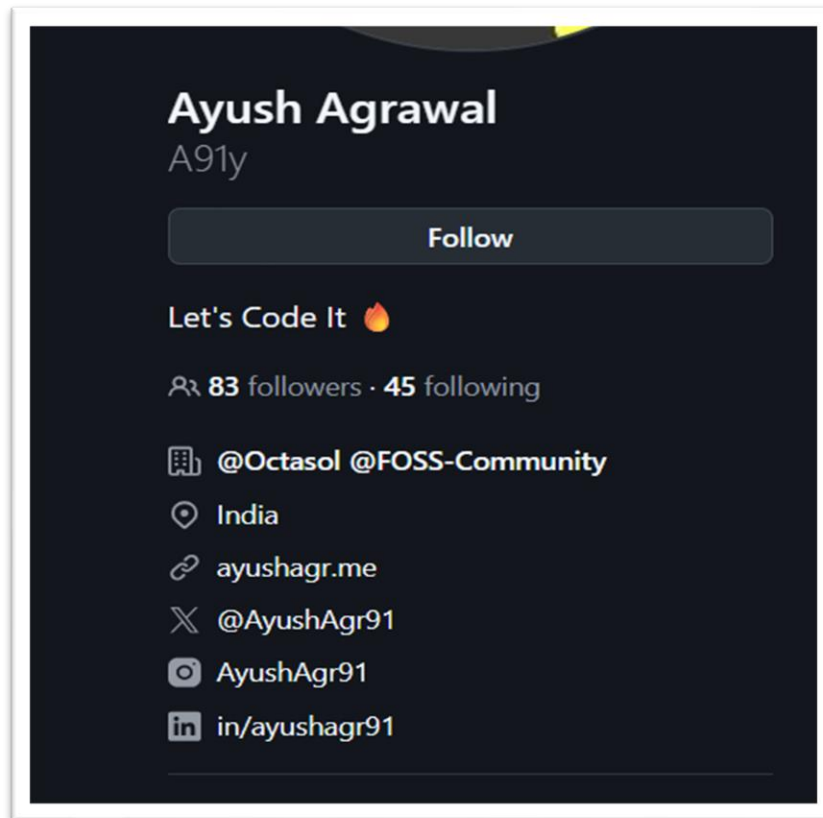

5/15 attempts

Flag

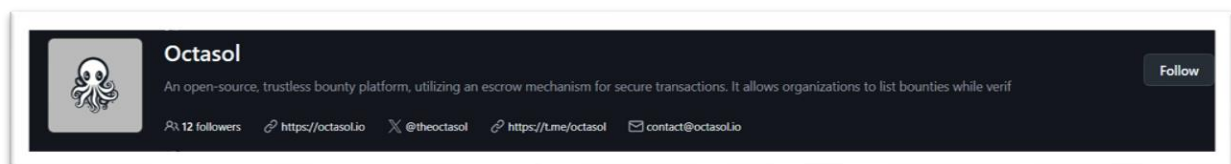

Submit

As the challenge ask, directly go to search A91y, got one github page.

The screenshot shows the GitHub profile of Ayush Agrawal (A91y). The profile includes a large yellow 'a' avatar, the name 'Ayush Agrawal', and the handle 'A91y'. It lists 126 repositories and 186 stars. The bio states: 'Hey, I'm Ayush Agrawal! Backend Developer'. A bio section lists interests in AI, Blockchain, and DeFi, and provides contact information: 'ayush.ag254@gmail.com' and 'My Portfolio'. Social media links for LinkedIn, Twitter, and Instagram are shown. The tech stack section is partially visible.

In this github page I got @Ocatasol that mostly refers in the challenge description, so I searched for that.

So I directly goes to the website, register on that then search for the Octasol leaderboard and I got the leader board where I search for the ethical buddy which is on the 9th position with the points and I got the flag.

FLAG: {9_47270}
