Here, I got the attachment so I download the image . I took time to do reverse image on google but got nothing.

So in the image we can see - visheshwaraiya bhawan, vikasi bahwan and vidhan bhavan etc. So I used maps and found the locations of the first two, as vidhan bhawan didn't have arrow. Based on the arrow I roamed around the place for sometime and found the location.

I use this specific link for the location but need to adjust accordingly also took some time but hopefully with luck I got that.

This is the exact location that was given in the image of the challenge. So, I just adjust it according to the image and got the perfect coordinates.
