

Challenge Name: SCHOOL — 200pts (Osint)

As I saw the challenge, I directly download the image to check for the place.

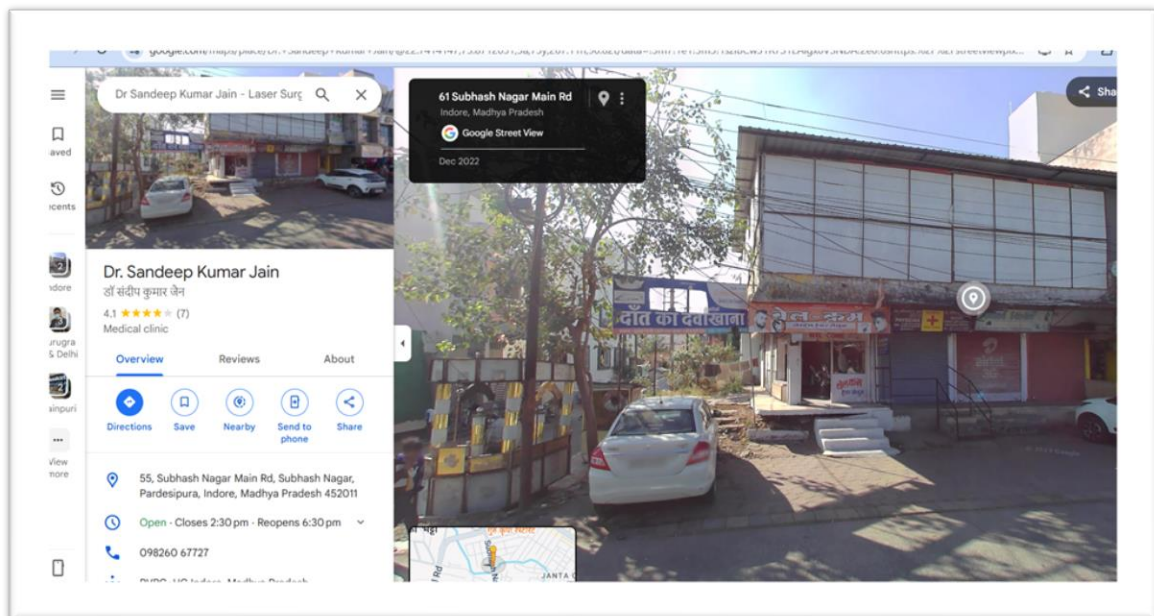

As I do too much reverse image on google, but I got nothing. Now, I realize that it will not be gonna easy to tackle this but one thing I understand that image is of madhya pradesh. So, I go to the google map and do much work for an hr to get the exact location and finally I got that.

from the above link you will see the exact location that I got from the map. This takes too much time for me to get this exact location as I need to go each and every street in the market side of the madhya pradesh to see where the exact location most probably may be.

After adjusting the image like given in the attachment, I got the exact coordinates.

**FLAG:** {22.7414147\_75.8712051}
