CHARKHI DADRI MID-AIR COLLISION (1996) - 349 DEATHS

The Charkhi Dadri Mid-Air Collision occurred on November 12, 1996, in India. The crash was caused by a miscommunication between the pilots of a Saudi Arabian Airlines Boeing 747 and a Kazakhstan Airlines Ilyushin Il-76. The crash resulted in the deaths of all 349 people on board both planes. This disaster was one of the deadliest mid-air collisions in history and highlighted the need for improved communication and collision avoidance systems.

I go deeper in search and got to know some more details about the incident.

Now, I goes to wiki and serch more deeper about the aircrafts.

And I got the exact what I need for the solution.
