**Challenge Name: SCHOOL — 200pts (Osint)**

As the challenge shows, I directly download the image, I saw a place with one school visible there.

As the image is given here so I directly go for the reverse image to search the similar place.

As inithial, I got nothing so I again read the challenge then understand the challenge need the principal name, so I just crop the school to serch the same building to get something similar.

Now, I seee some similar buildings.

Now, searching the name of academy with principal name I got a website

From there I got this website and solution as well.
