Challenge Name: Nine — 100pts (Crypto)

This is a crypto challenge and by seeing the encrptes text, I understand that it start with 9 that reminds me a type of hash form that I saw in one of my previous CTF, that is Juniper 9
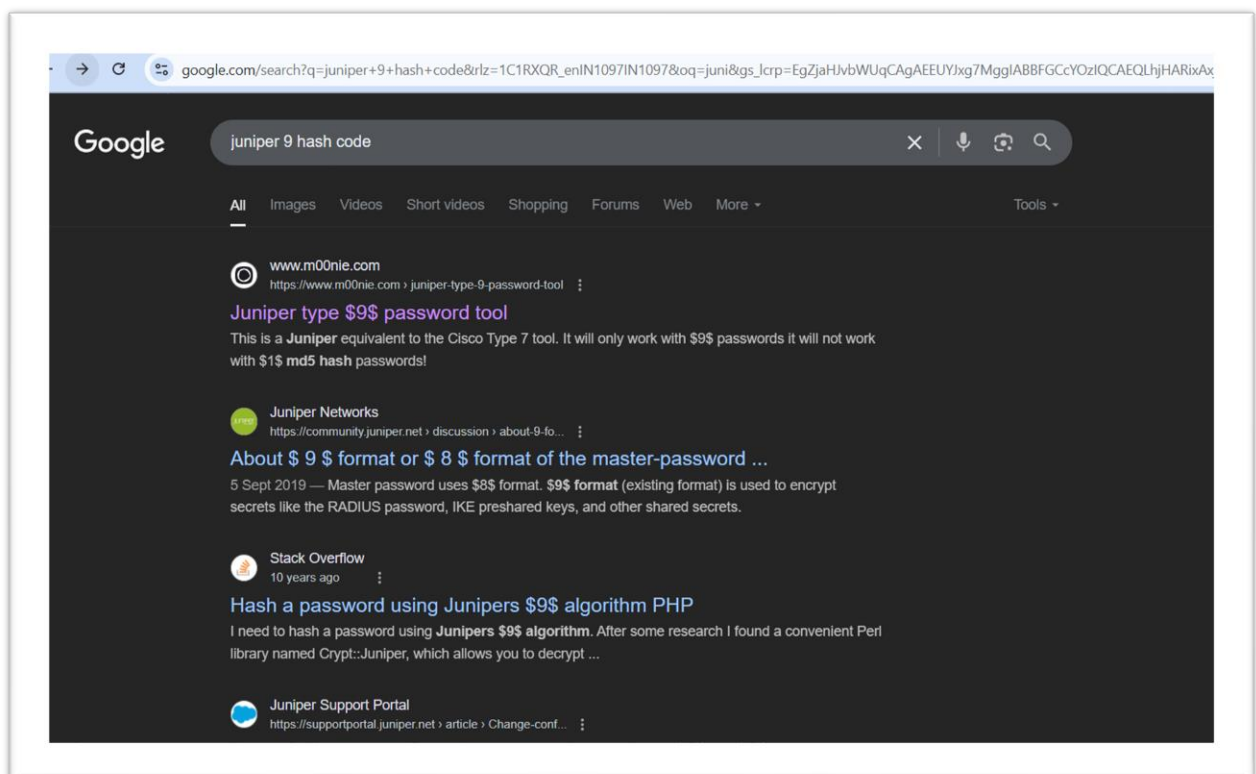

So, idirectly search for the site and I got one site that shows the same.

Now there is the option I saw at the bottom to encrypt or decrypt so I directly put my string to check the decryption from that.

As when I put that, I directly got the flag.

FLAG: {easypeasy}
